

Remington – Pratts – Gordonsville 230kV Transmission Project

Dominion Virginia Power
May 6, 2015

Project Need

Maintain Reliability and Increase Capacity for Growth

- ❑ Dominion Virginia Power (Dominion) and FirstEnergy are working together on a series of transmission upgrades that will resolve electric reliability issues in the Piedmont region west of Interstate 95 and east of Shenandoah National Park in Virginia.
- ❑ Will maintain reliable electric service for the region and directly benefit more than 25,000 electric customers in six counties: Fauquier, Culpeper, Orange, Madison, Greene, and Rappahannock

**Provides
Redundancy**

**Maintains
Reliability**

**Addresses
potential
violations of
Federal and
Company
standards**

Community Engagement

Community Feedback:

- Concerns about potential impact to:
 - farm land
 - scenic and historical areas
- Constructive and specific requests to adjust line to better align on property
- Critical information provided on conservation easements, pending conservation easements and land use issues that were unintentional missed in our data collection

Area Constraints

Routing Study

Routes shown at
April 2 and April 15
